

CHECKLIST

- ▶ Install (correct) USB drivers—typically CP2102 or CH340g
- ▶ Connect computer and ESP8266 to the same network
- ▶ [Windows] Install Apple Bonjour for Windows:
<https://support.apple.com/downloads/bonjour-for-windows>
- ▶ Restart Arduino IDE
- ▶ `ESP.restart()` fails after uploading firmware over USB.
Restart the ESP8266 board and it'll work!
